**PLM PRODUCT LIFECYCLE MANAGEMENT**

**From season and line planning to merchandising, product design & development to costing, samples making, sourcing, manufacturing and logistics all information is kept in a single place.**

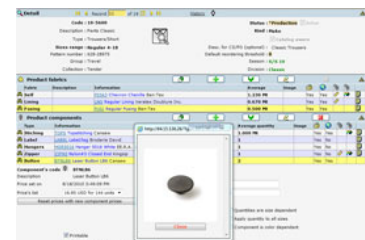

OLotech is a powerful classification system; the catalogue view is available for product selection down to individual customer history. All product versions are inventoried and all style modifications are recorded on a per user "who, what and when" basis. The Product Status identifies and controls the different stages of the product and is linked to the ERP inventory specifying if the product can be produced/purchased, or if only existing stock and extra WIP can be sold. Product Status can also be affected by the Project Management as steps are completed by the applicable user and/or contractor.

[Read More](#)

**ONLINE SPEC SHEET**

Online garment specification gives you the latest version of the tech pack at all times. Measurement specifications can be imported from Excel, or generated using specification libraries, similar to grading rules. Measuring template can be generated in Excel and then attached to the product archives.

New styles are easily created by duplicating from existing master product version, copying over Header information, Photo, Technical Image, Fabric, Component, Colors, Instructions, Care instruction, Measurement Specifications Labor and/or Selling Price.

MANUFACTURER

**RAW MATERIAL INVENTORIES**

**Fabric inventory includes a subdivision for shade/location (dye lot/contractor).** Component inventory management is controlled on a Stock or As needed basis. Material purchasing can also be handled on a minimum threshold per colors basis and by length for component.

**APPAREL WEB MRP AUTOMATION**

**Material requirements planning is linked to product inventory.** Creation or modification of customer order, purchase order and cutting slip instantly affect material inventories. Production planning can be done by division, season, collection, group, shipping dates, fabric, color, component, warehouse, customer and others discretionary criterions..

**PURCHASE ORDER MANAGEMENT**

**Material purchase orders are automatically generated from customer order, low inventory or both.** Inventories are link to supplier and include purchasing price and inventory price (costing). Supplier and price can be modified at any time. As needed trimming purchase order include Cutting slip number.

**CUTTING SLIP & PRODUCTION**

**Cutting slips are generated automatically from customer order and/or low inventory.** Bill of Materials are available per cutting slip or per working order batch. Cutting slips of different versions of product, can be summarized as a single cutting slip to simplify production.

**AUTOMATED BUT FLEXIBLE PRODUCTION**

**From Customer order to Fabric/Trimming Purchase orders to Cutting slips and Packing lists/Invoices, all inventories of finished goods and raw material are linked for a complete automated process.**

OLotech is a management-software that integrates all operations from catalogue, product sheets and sourcing to sales and accounting. Developed for Apparel manufacturers, our solution allows the control of all variables for versions, colors, sizes and related components for a single product. It considerably simplifies the production process for a momentum in inventory management and a better cash flow.

[Read More](#)

**POS - POINT OF SALE**

**Simple user interface for consumer retail operation. Scan barcode and print receipt.**

The POS mode can be activated for the staff running the boutique. This option simplifies the use of the software and limits the scope to the boutique. However, the inventory of the boutique is integrated and the availability of stock of other boutiques and warehouse can be viewed

**Functional across multiple divisions and location for inventory management, reporting and commissions management.**

The multiple user's settings such as privilege division warehouse and access hours allows to personalize the environment of sales representatives.

**OLOtech automates all operations, saving you from re-entering customer\supplier static information and product information line-by-line instead of at one time.**

Information of all departments are linked together to simplify company management and customer support. OLOtech automatically generates Purchase orders and manages Finish Goods Inventory allocation, Packing List\EDI 856, Invoice\EDI 850 and Sales Representative commissions. Customer order\EDI 810 are entered online or imported from text file (example from Web store). Product inventories are managed per warehouse and per bin...

**IMPORT PROJECT MANAGEMENT**

**The project management allows you to easily manage the design and production of hundreds of styles per activities due date, staff responsibility and supplier.**

Each project can handle one or multiple styles and unlimited amount of activities. Each activity has a plan and actual start and finish date related to a specific calendar. At the completion of an activity OLOtech can sent automatically a message to the next responsible and can modify the Product Status.

**CUSTOMER RELATION MANAGEMENT**

- Customer priority for Stock Allocation
- Parent Company for Invoice and Report
- Default Selling Price and Discounts
- Main/Shipping/Billing addresses
- Packing list and Invoice in Client language
- Multiple Sales Representative per Client
- Main/Shipping/Accounting Contacts

**BARCODE UPC B128**

- Automatically generated barcode
- Import from Excel files
- Scan & Pack / Validate Inventory

**COMPLETE SOLUTION SOFTWARE - NO PRICEY "OPTIONAL MODULES"**

OLOtech is only available as full package software to avoid common problems related to add-ons modules. In addition to simplifying the use of the software, this "no optional modules" approach ensures the consistency and continuity between product development, purchasing/production and selling operations. Furthermore, all information is live. Since all information is connected, it is very easy undoing any operations. All functionalities for PDM/PLM, Manufacturer and Importer can be activated when needed. Only PDM/PLM section is available separately, also being extended to the complete solution at any time.

**SAAS-SOFTWARE AS A SERVICE - OLOTECH SERVER ONLY *CDN\$470 PER MONTH* UNLIMITED AMOUNT OF USERS**

Rent or Buy? Instead of purchasing the software you can use it as an Internet service and pay monthly. All Email/Skype Support and Software Upgrades are included with subscription service.

OLOTech is an affordable apparel management software for small and mid-sized manufacturers/importers. The price of PDM/PLM section only is CDN\$225 per month, and can be upgraded to the full solution at any time. SaaS does not include local Internet access. Service can be cancelled at any time. Service can be converted to software purchase at any time. CDN\$595 first time use activation fee is free with 3 months advance payment.

In comparison to traditional software SaaS implementation is far faster...get up & running in weeks, not months. Cost of ownership is far less, also allowing you to reduce overhead costs by granting access to Customers, Sales Representatives and Contractors. Each Password specifies what can be seen or modified and deleted.

**SOFTWARE PURCHASE - ON YOUR SERVER ONE TIME *CDN\$19,995 - INCLUDES 2 YEARS SERVICE & UPGRADES* UNLIMITED AMOUNT OF USERS**

The software will be installed on your computer remotely using Remote Desktop Connection. Your OLOtech is setup for outside premises users by a no-ip type service. After the first two years, the next one year essential Support, Service and Upgrade Contract is only CDN\$2999. OLOtech is .NET (pronounced "dot net") software considered by the trade as being as innovative as Windows was to DOS. One important aspect of OLOtech ERP is the cost of the total solution. Since Microsoft.NET Framework, the SQL Express and the Browser are free software, you only pay for the ERP portion. Alternately the PDM/PLM section can be purchased for only CDN\$8495, and CDN\$1275 per year for the essential Support, Service and Upgrade contract after the first 2 years.

**SUPPORT 24/7**

**Support is provided on Skype**

(free Internet phone, screen sharing, video call) Service contract covers OLOtech software and related Microsoft software. OLOtech is responsible for information security backup (SaaS). General inquiries can be address by Email. Emergency phone number is available 7/24. Information obtained for support purposes is strictly confidential. The only employees with access to such information are those authorized to process inquiries or requests that concern the information provided. The administration of Users, Roles and Customer/Supplier filtered access is the responsibility of the client.

**Implementation service**

The price for implementation service is CDN\$105 (Skype) per hour bill per 15 minute or CDN\$695 per day + expense for onsite training. We will assist you on a daily base during the implementation process. We will lead you to the different system options relative for your type of business. We will guide you in the creation of all lists; division, size range, currencies, taxes warehouse and bin etc.

In order to speed up implementation process we will assist you with importing all information available in text file; product, colors, fabric, price, client, suppliers etc. Once your OLOtech is setup, we will create a duplicate test / practice database; thus allowing you to simulate any complete or partial operations cycle without worrying about altering your real data. When ready we will monitor you during your first live complete operation cycle. At the end of implementation, we will review with you the different group of system privileges, the option relative to user and the filtering of clients, sales rep, contractor and supplier access.

COMPANY

## 23 YEARS OF INNOVATION IN APPAREL SOFTWARE

From 1988 to 2000 we developed and sold in 37 different countries PAD System apparel CAD/CAM. Today we bring Internet/intranet solutions to apparel manufacturers and importers. Our Web based software is the solution to reduce the overhead by fostering e-business collaboration. Electronic Catalog, online Specifications and online Order foster e-business collaboration within your entire supply chain. Compared to usual ERP OLOtech is very accessible, easy to use and flexible. Our significant information technology experience gives us the necessary background and judgment to propose profitable solutions in short, medium and long terms.
